We are Award Winners!

Although our parents told us that we should be humble and not boast, but we are making an exception, as we are pleased as punch. We have been nominated for, and WON, the BUILD Magazine Award for:

Best Independent Fire Safety Services Company – UK

As a business, we are always looking to provide the best service to our clients, so we are delighted to have received recognition and to know that we were even nominated for the award. We hope that this helps give credibility to our work to those of you who haven't worked with us yet, and that if you are looking for a company to assist with your fire safety, you might like to give us an opportunity to prove our salt.

ZONE 1 service base

Fire Safety Consultancy

"Our aim is to reduce non-approval risk and increase design certainty from the outset."

This service is designed to provide tailored fire safety solutions to our clients' specific requirements. By employing us early in your planning process, our consultants will provide expert advice that will help minimise the risk of your plans being rejected or challenged by the Fire Service, Licensing, Local Authority, Building Control or other approved inspector. This will enable your project to be expedited through to the point of implementation. As a result, many of our clients have saved time, money and unnecessary stress.

When would I need fire safety consultancy?

- Designing or constructing a new building or building refurbishments
- Changes of use or occupation of an existing building
- Refurbishment of an existing building
- If fire safety advice is required for a specific issue

Who would use the consultancy services?

- Architects and building design consultants
- Facilities managers and management companies
- Property management and development companies
- Construction companies

Why Use Adena Fire?

Our consultants draw from vast experience gained both in the commercial and public sectors, as well as possessing in-depth knowledge and understanding of technical fire safety within the Fire Service – enabling them to foresee and pre-empt potential objections that may arise during the design process. Our consultants are highly qualified in all aspects of fire safety and fire engineering (to MSc Level in Fire Engineering), fully conversant with ADB (Approved Document B), BS 9999, as well as bespoke fire engineered solutions, so you will receive first class service for competitive fees (as we keep our overheads low).

Why not give us a call on 0845 6432 999 to discuss your requirements?

ZONE 2 team focus

Some facts about about Chris - Professional

Chris has worked in the fire safety industry for over 30 years. Chris retired from London Fire Brigade in 2013, since this time he has worked in the private sector, carrying out fire safety services including Fire Risk Assessments, Fire Safety Consultancy and Fire Safety Training.

Rising to Borough Commander in the London Fire Brigade, he gained significant operational experience.

Some facts about Chris – Personal

Chris lives in Kent, and has two children – George, 15 and Bella, 13. He is the Manager of the England Under 17s Roller Hockey team, and spends most of his weekends travelling around the UK for matches with his son George who plays for the team!

ZONE 3 consequences

There are always consequences...

A Welsh construction firm has landed a fine totaling £100,000 after admitting to fire safety breaches at its timber frame construction site, reports the Construction Enquirer.

J G Hale Construction Ltd came under investigation by HSE after making an unannounced visit at the site.

Inspectors found that measures to prevent a fire starting and getting out of control had not been properly taken, the houses under construction had little fire protection, there was a lack of site management control, insufficient means to detect a fire and raise the alarm, poor control of ignition sources and a general lack of emergency planning.

Improvement Notices were served regarding fire and vehicle safety issues and these were complied with after two further inspection visits.

After the hearing, HSE inspector Liam Osborne said: "Hale Construction had been given plenty of warnings about fire-safety and traffic risks in the recent past, including from HSE.

"Timber-frame houses are perfectly safe once they're finished and protected, but when under construction they can be very dangerous.

"Stringent fire-safety standards need to be in place well before the build starts, and then maintained and monitored".

ZONE 4 advice

We are being asked more frequently by companies to provide our consultancy services to enable them to obtain the relevant approvals for their buildings.

However, it is worth noting that the most effective way to use the consultancy service is during the planning stage of either the particularly valuable in ensuring that the plans meet the relevant approvals when it is given prior to the construction of, or changes to, the premises in question.

By involving us early in the process – usually following the completion of the draft plans – we are able to provide advice which saves both money and time.

We will give impartial advice, which may not always be what our clients want to hear, however, it will be advice that will ensure your plans are passed first time.

ZONE 5 downloads and docs

FIRE SAFETY LOG BOOK [DOWNLOAD](#)

Fire Safety Log Book

A Log Book is required to note and detail the testing and maintenance of your fire safety practices, and is reviewed by the Local Authority Fire Service.

[DOWNLOAD](#)

FIRE SAFETY LAW SUMMARISED [DOWNLOAD](#)

The Regulatory Reform (Fire Safety) Order 2005

This normally complex document has been produced in a simple to understand summary version for you to download.

[DOWNLOAD](#)

Amazing!

A former fire station first used in the 1920s has been rediscovered in the basement of an old Co-op factory after being hidden for half a century.
